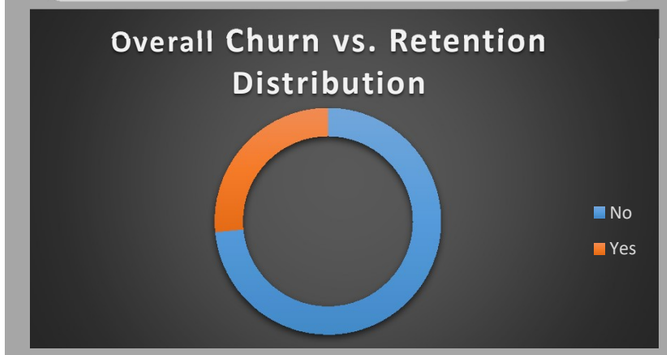
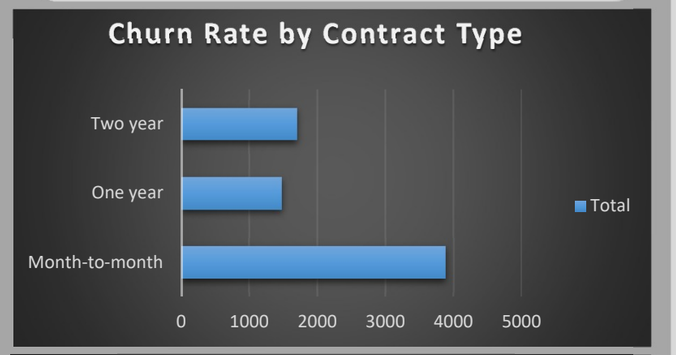
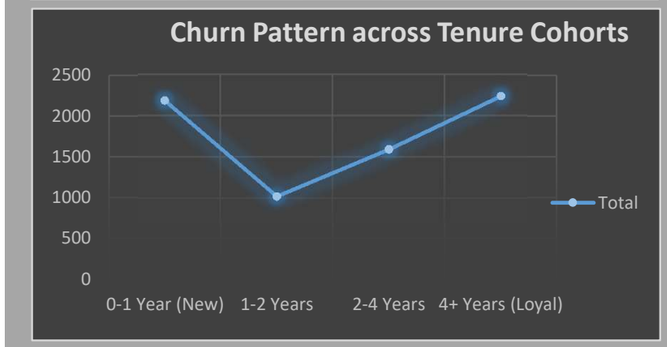
Customer Churn & Retention Analysis

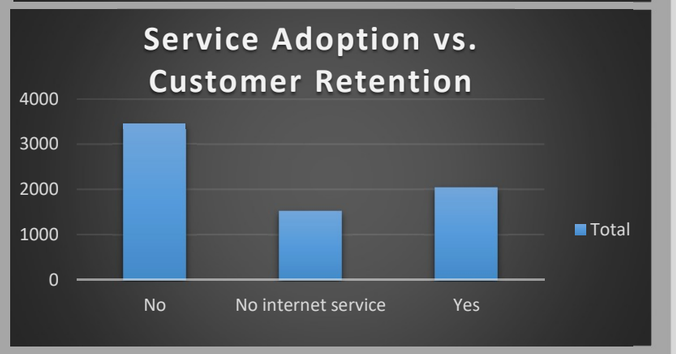
CHURN RATE	27%

RETENTION RATE	73%









Tenure (Months)	Churn Risk %
<1	0%
1-12	48%
13-24	29%
25-36	22%
37-48	19%
49-60	14%
61-72	7%

Strategic Advices

Contract Strategy: Incentivize Month-to-Month users to switch to Annual plans to reduce churn by up to 40%.

Onboarding Focus: High churn in the first 12 months suggests a need for better customer engagement in the

Feature Promotion: Actively promote "Online Security" as a retention tool, as users with this service stay 2x longer.

Pricing Optimization: Investigate high churn among customers with **High Monthly Charges**; consider offering personalized "loyalty bundles" or tiered pricing to retain budget-sensitive users.

Critical Retention Window: Analysis shows that **48% of churn occurs within the first 12 months**. To increase profitability, the company must focus on first-year engagement programs, as churn risk decreases significantly (to only 7%) for long-term loyalists.
